Hi, Ion

I thought this thread was dead for almost a year Anyway, thanks for your opinion... I actually never started with the application, it stayed only on drawing board. But it might be useful for future, I'll definitely keep GMP in mind.

Honza

In this forum many threads dead, because it is not so populate. But the concept of U++ project is very interesting. Answers of the unclear question you can find on the other forums... and after then put here result of your job.
In this case, together, we can develop a very powerful instrument.

Thanks to Mirek and to all contributors for the great job.
Ion Lupascu (tojocky)
