hilo,

I tried to build from source (upp-x11-src-1538.tar.gz) on my deb Etch, but the compilation has failed:

```
c++ -o ide.out -WI,-s -L"/usr/X11R6/lib" -L"/usr/lib" -WI,-O,2 \
...
_out/RichText/GCCMK-Gcc-Gui-Linux-Posix-Shared/RichText.a(Te xtPaint.o): In function
`Upp::RichText::GetInvalid(Upp::PageY&, Upp::PageY&, Upp::Rect_<int> const&, int, int, int, int)
const':
TextPaint.cpp:(.text._ZNK3Upp8RichText10GetInvalidERNS_5Page
YES2_RKNS_5Rect_IiEEiiii+0x354): undefined reference to `Upp::RichTxt::Sync(int,
Upp::RichContext const&) const'
collect2: ld returned 1 exit status
make[1]: *** [ide.out] Error 1
```

Does anyone know how to get over with this?

thx!

gabor
