Hilo,

I have removed the inline keyword in RichTxt/TxtPaint.cpp:

```
inline void RichTxt::Sync(int parti, const RichContext& rc) const {
```

and it has been compiled and built successfully.

with 1540, on debian etch, gcc version 4.1.2 20061115 (prerelease) (Debian 4.1.1-21)

Do you have guess why the inline keyword was a problem on my box?

Gabor
