Hi all!

Sorry my english, but i have no idea, where else i can find the solution to my problem.

I want to use SSL connection to server in my project. I downloaded opensll and try to setup them on my pc. But i could not get libeay32.dll & libeay32.dll.

Can you tell how to properly and fully installed openssl to u++? May be there is some link to resource?

Thx.
