darthspawn wrote on Mon, 31 August 2009 16:50 I need to create a button that let me choose a default color for a grid column in the setup of the application, like the BG choice in the UWord example application. Is possible to make this? I don't find example.. Thanks
Sam

Hi Sam,

There are several widgets to handle colors in U++. They are described in this manual page. Best choice for you would be probably ColorPusher, which can be easily used like this: #include

```
<CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
class win : public TopWindow{
public:
    typedef win CLASSNAME;
    ColorPusher cp;
    Label l;
    void DoSomething(){
        l.SetInk(cp.GetData());
    }
    win(){
        cp.SetRect(10,30,40,20);
        cp.SetData(Black());
        cp<=<=THISBACK(DoSomething);
        Add(cp);
        l.SetText("Color test").SetRect(10,10,150,20);
        Add(l);
    }
};
```

```
GUI_APP_MAIN{
```

```
    win().Run();
```

```
} Of course you would have to change DoSomething to actually do what you need with the  
selected color.
```
