Hi,

Postgresql uses "except" not "minus", so SqlSet operator- and SqlSelect::operator= should be modified:

```
SqlSelect& SqlSelect::operator=(const SqlSelect& s2) {  
    text << SqlCase(PGSQL, " except "(" " minus "(" << s2.text << ');  
    return *this;  
}
```

```
SqlSet operator-(const SqlSet& s1, const SqlSet& s2) {  
    if(s1.IsEmpty() || s2.IsEmpty())  
        return s1;  
    return SqlSet(s1() + SqlCase(MSSQL|PGSQL, " except "(" " minus "(" + s2(), SqlSet::SETOP);  
}
```
