Enclosed spanish translation ES-ES.

After checking old translation file, I think it is necessary to create more ES- translations.

For example I have seen the verb "ingresar" with the meaning of adding text into a field. This is used in America.

In ES-ES it can mean:

- To join the army
- To be admitted in a Hospital
- To be taken to a prison
- To pay a sum into a bank account

The verb admitted in ES-ES would be "insertar". "introducir" would be also possible.

Best regards

Koldo

Thank you, translation imported...

Mirek
