Mindtraveller wrote on Thu, 24 September 2009 16:05 Thank you. Is there a possibility to add support of newly added charsets and MBCS into QTF?

There is always a possibility, but in this particular case I do not see much sense...

After checking QTF code:

Maybe adding something like

```
int FetchChar(char &* ptr);
```

- reads multibyte character from source pointer, moves pointer as needed

would be helpful. Or I can change the code a bit more and just use block conversion (from above api).
