koldo wrote on Mon, 05 October 2009 17:49Hello all

I would like to know how to insert Ctrl like EditString, Button or DropDownList inside a RichEdit.

Here I enclose you a simulated screenshot from RichTextObject example.

With it it would be possible to fill forms made with RichEdit and launch functions.

Best regards
Koldo

At the moment, this would be hard.

The only way is to use

[http://www.ultimatepp.org/reference\\$RichTextLayoutTracer.htm](http://www.ultimatepp.org/reference$RichTextLayoutTracer.htm) I

and then place widgets over the RichText.

Mirek
