tojokey wrote on Wed, 23 September 2009 12:38I see that this bug is not corrected.

It is persist in ubuntu 9.04 too!

tojokey wrote on Mon, 03 August 2009 11:43Hello All,
Very interesting project.. by I thing that have a little bag.

This bug i produced on win32 windows xp os with the latest svn repository. When I unmark and after then mark Windows Menu button from Docking window Manager form, The buttons of the docking windows was positioned wrong.

Fixed. It was actually caused by hiding the buttons then showing them again.

I haven't merged the translation files yet.
