koldo wrote on Thu, 01 October 2009 17:08Hello

I would like to show a help message when moving the mouse over an ArrayCtrl row.

This message text would depend on the row.

This could be similar to the message that appears when moving over a Bar button, or the text in the status bar with .Help("Message") also in Bars.

Best regards
Koldo

I guess overriding MouseMove and changing Tip accordigly to the column/row might work.
