jiuzhi wrote on Mon, 12 October 2009 16:20I make a new project with template "CtrlLib application with mainwindow",and selected "Imagelist file"&"Multithreaded" flags

And then, I press F5 to build it.There some errors.How can I make it work.

Hello, Jiang.

You didn't say about your version of GCC.

With 4.4.1 version of TDM's GCC such a package can be compiled.
