Also, on the DoMin() and DoMax() type functions, can this be added to GridCtrl.cpp around line 4627 (SyncSummary function)? It allows the DoMin() and DoMax() summary options to work on Dates.

```
else if (IsDateTime(v))
{
    switch(sop)
    {
        case SOP_MIN:
            if (((Date) v) < ((Date) t))
                t = v;
            break;
        case SOP_MAX:
            if (((Date) v) > ((Date) t))
                t = v;
            break;
        case SOP_SUM:
        case SOP_AVG:
            t = v;
            break;
    }
}
```
