Subject: how to change a line in string in zhCN translation file?
Posted by bonami on Wed, 04 Nov 2009 06:04:32 GMT

1st, many chinese characters cannot end a string in .t file, otherwise compilation fill fail. as you can see in the .t file i enclosed, i have to add two-byte space characters to avoid this.
2nd, i cannot successfully put '\n' in chinese string as the application i enclosed shows.
