1700 is almost OK, but has a little problem. When first time compile, auth.cpp occur same error.:  
F:\upp-svn\uppsrc\Web\auth.cpp : warning C4819: The file contains a character that cannot be represented in the current code page (936). Save the file in Unicode format to prevent data loss

F:\upp-svn\uppsrc\Web\auth.cpp(207) : error C2001: newline in constant

for msc7.1 that problem is disappear at second time compile, but for MSC8 it can't disappear.
