Subject: How to trim leading and trailing spaces in EditString?
Posted by Zbych on Fri, 20 Nov 2009 09:10:20 GMT

Hi,

What is the simplest way to add a trimming of spaces to EditString?
I tried to add a conversion. It works fine, but EditString stopped reacting to NotNull flag.

Here is the code of my converter:

```
struct TrimConvert : public Convert {
 virtual Value Scan(const Value& text) const {
  return TrimBoth(text.ToString());
    }
};
```

Question is what I am doing wrong?
