I tested Hydra settings on a P4 2800 Mhz with 2 Hyper Threading units. Compilation times for recompiling the CodeMetric example:

1 Thread: 2.30

2 Threads: 2.12

3 Threads: 2.02

4 Threads: 1:17

5 Threads: 1:13

6 Threads: 1:10

7 Threads: 1:16

8 Threads: 5:51

It seems that it is good to set thread count higher than number of CPU cores. Best result was achieved with 6 threads.
