masu wrote on Thu, 26 November 2009 15:21Hello Ion,

thanks for the tool.
I have tried it in WinXP, compiled with MSC9.

I had to change declaration of 2nd function parameter of SetProxyAuth to String (it was int before).

What is not working correctly is translation for multi-line phrases. Translation always stops after first line.

Regards,
Matthias

Thank you Matthias for test.

I was attached the new version of GoogleTranslator with correction!
Can you test?

Regards,
Ion.

file deleted!
