lon

I have tried it under a proxy and I get this:

Quote:Error:HTTP/1.1 407 Proxy Authentication Required ( The ISA Server requires authorization  
to fulfill the request. Access to the Web Proxy filter is denied. )  
, status: 407, HTTP/1.1 407 Proxy Authentication Required ( The ISA Server requires  
authorization to fulfill the request. Access to the Web Proxy filter is denied. )  
, header: Via: 1.1 BNT44  
Proxy-Authenticate: Negotiate  
Proxy-Authenticate: Kerberos  
Proxy-Authenticate: NTLM  
Connection: Keep-Alive  
Proxy-Connection: Keep-Alive  
Pragma: no-cache  
Cache-Control: no-cache  
Content-Type: text/html  
Content-Length: 4112

In configuration I have entered the same proxy data I have in Firefox, that works well.

Perhaps I can try something to try to solve this. Could you give me some advice ?

Best regards  
Koldo

Did you check the option "Use HTTP proxy"?  
regards, lon

Hello lon

Yes. I check "Use HTTP Proxy:" and "Use HTTP Proxy password:" and I fill "Address", "port",  
"Username" and "Password". This data is the same I use for Internet browser Firefox I use daily.

I have also debugged the program and it does what it seems it have to do. Any additional advice ?

Best regards  
Koldo
