koldo wrote on Wed, 02 December 2009 02:49Hello Mirek

Very recently there have been a change in DrawLineStroke() so that from now all lines are rounded. All previous calls to LineCap() are useless:

```
void Painter::DrawLineStroke(int width, Color color)
{
    Begin();
    LineCap(LINECAP_ROUND); <==== Line added
    switch(width) {
        case PEN_NULL:
            Stroke(0, color);
            End();
            return;
        case PEN_SOLID:
            Stroke(1, color);
            break;
        case PEN_DASH:
            Dash("18 6");
            break;
        case PEN_DOT:
            Dash("3 3");
            break;
        case PEN_DASHDOT:
            Dash("9 6 3 6");
            break;
        case PEN_DASHDOTDOT:
            Dash("9 3 3 3 3 3");
            break;
        default:
            Stroke(width, color);
            End();
            return;
    }
    Stroke(1, color);
    End();
}
```

It would be good if you could remove that line

Best regards
Koldo

This is to improve the similarity of Painter and host platform Draw. Win32 basic line draw has caps rounded...

If you need full control, please use Painter API.
