
Subject: CtrlCore: X11App.cpp should #include <locale.h> [BUG][FIXED]

The file CtrlCore/X11App.cpp uses constants (LC_ALL) and functions from the locale.h header but it does not include it. I suppose that in some environment it is included indirectly by some other header file, but on a Linux I have tried, it was required to include this header directly to X11App.cpp. Please correct this.
