Hi Koldo,

that is looking great, but if i try to compile it on my ubuntu 9.10 with ultimate 1801 ther ar some bugs:

Linking...

/home/dieter/upp.out/Functions4U/GCC.Gui.Mt.Shared/Functions 4U.a(Functions4U.o): In

function `GetExtExecutable(Upp::String)':

Functions4U.cpp:(.text+0x5c8c): undefined reference to `LoadFile_Safe(Upp::String)'

collect2: ld returned 1 exit status

There were errors. (0:01.34)

Do you know whats wrong?

Best regards

Dieter
