koldo wrote on Tue, 22 December 2009 00:03What is new in version 1824:

Core:

- * XmlRpc package adds support for XML-RPC based webservices.
- * LanguageInfo in Core has been completely refactored.

TheIDE:

- * Autosetup now recognizes Win32 SDK 7.0.

Bazaar:

- * GoogleTranslator: New version.
- * Functions4U: New package with additional functions to complement Core and CtrlLib.
- * Controls4U: New package with additional graphic controls.
- * SysInfo: Improved Unicode support.

Nice!

Together we do more!

Koldo, for you, username and password for proxy address in GoogleTranslator works?
