Hello all

I wanted to have an Splitter with transparent background.  
The Splitter is child of a StaticRect.

So in the parent constructor:

```
Parent::Parent() {  
    splitter.Transparent();  
    Background(Null);  
}
```

The splitter looks transparent, but when resizing the splitter middle frame, the splitter gets black:

Do you know how to solve it ?

Best regards  
Koldo
