It is useful to me.
Thanks for your sharing, Sc0rch

BTW, one member function of first version of the Simple XML keymap parser,

```
inline bool XMLConfig::Load(const String& path){  
    if (!FileExists(path))  
        return false;  
  
    Path = path;  
    return path == "Default" ? LoadFromXMLFile(*this) : LoadFromXMLFile(*this, path);  
}
```

should be

```
inline bool XMLConfig::Load(const String& path){  
    if ( path != "Default" && !FileExists(path) )  
        return false;  
  
    Path = path;  
    return path == "Default" ? LoadFromXMLFile(*this) : LoadFromXMLFile(*this, path);  
}
```

right?
