Better and correct name for GetSysTime is GetLocalTime.

I agree, but 'Sys' has to stay - too many code written already.

I wonder if GetLocalTime shouldn't be a define and from here on out encourage people to use GetLocalTime simply for clarity in their own apps.

Jeremy

Does not need to be #define, Time GetLocalTime() { return GetSysTime(); } (or vice versa) would work as well.

Still, at this stage, IMO it is nitpicking. After all, you set your PC time in BIOS to your local time -> I would say system time is local then...
