Hello Mirek

It seems not a problem of RichEdit itself.

Just before PromptOK there are now two lines to save the image and it looks perfect.

```
GUI_APP_MAIN
{
  ImageDraw idw(1200, 600);
  idw.DrawRect(0, 0, 1200, 600, White);
  idw.DrawText(0, 0, "(Hello)", Serif(400));

  DrawingDraw dw(350, 250);
  dw.DrawImage(0, 0, 350, 250, idw);

  QtfRichObject pict(CreateDrawingObject(dw.GetResult(), Size(350, 250), Size(350, 250)));

  /**/ PNGEncoder png;
  /**/ png.SaveFile("c:\\kk.png", pict.obj.ToImage(Size(350, 250)));

  PromptOK(String("[A5 Rendering problem: ") + pict.ToString());
}
```

Best regards
Koldo
