Sc0rch wrote on Mon, 25 January 2010 16:03hmm, bug with ','
Not only with ',' found. Fixed.

Quick fix:

```
String GetText()
{
    if (Text.GetCount() == 1 && Text[0] == '\\')
        return "";
    else if (Text.GetCount())
    {
        String t = Text;

        if (Text[0] == '\\' && Text[Text.GetCount() - 1] == '\\')
            t = Text.Mid(1, Text.GetCount()-2);

        if (t.Find("\\\\") >= 0) ::ReplaceString(t, "\\\\", "\\");
        if (t.Find("\\[" ) >= 0) ::ReplaceString(t, "\\[", "[");
        if (t.Find("\\]" ) >= 0) ::ReplaceString(t, "\\]", "]");
        if (t.Find("\\=" ) >= 0) ::ReplaceString(t, "\\=", "=");
        if (t.Find("\\," ) >= 0) ::ReplaceString(t, "\\,", ",");
        if (t.Find("\\\\") >= 0) ::ReplaceString(t, "\\\\", "\\");
        return t;
    }
    return Text;
}
```

New version of IniParser:
