How realistic do on site [www.ultimatepp.org](http://www.ultimatepp.org) Russian menu on the left, if the person switched to the Russian language in the articles?

Good question

Now two important things are hardcoded in uppweb source:

- Left menu text strings and links: check variable "bi"
- en-us extension. It is everywhere in the program

This means uppweb source has to be changed to have Russian left menu.

This is not very difficult, but it would require some hours from somebody .

Best regards

Koldo

I propose use .t file for translations of site elements.
