I am new to U++, seems like a great project.

I have tried all the GUI in the tutorial folder (Gui01 to 22) and have the GUI Tutorial:
 http://www.ultimatepp.org/srcdoc$CtrlLib$Tutorial$en-us.html

I am having a problem with Menu bar and 5 Labels/Text Boxes.
I have one GUI that has a Menu bar with all the menu items with sub menus and links. Another GUI that uses the .lay format has 5 Labels and editable text boxes.

The GUI with the Menu I am having a problem adding the Labels/text boxes.

The GUI with the Labels/text boxes I am having a problem adding the Menu.

None of the Gui01 to 22 has both Menu and Labels/Text boxes.
An example that does this would be appreciated.

edit: Starting with the tutorial Gui16 how could a Menu bar be added?

I am getting errors like this:
error C2039: 'Exit' : is not a member of 'Upp::TopWindow'
error C2276: '&' : illegal operation on bound member function xpression

Or starting with Gui07 how could you add the Labels and text boxes?
