cbpporter wrote on Wed, 27 January 2010 09:09Your problem seems to be that you did not add the correct packages to your main package. You should have Core and Web added.

Thanks cbpporter!

Remember I am a noob to U++.

I looked at the upper left corner of TheIDE and noticed the one that worked has "Web". The ones that did not work did not have it.

I added "Web" and it links without error.

Thanks again but you could be a little more explicit to us noobs.
