Hello all

Everybody talks about improving public relations (PR). Here is one opportunity to do something useful for U++ users and that could help to improve our PR.

UltimateBook goal is to get a book from all project documentation.

The presentation is here : http://www.ultimatepp.org/srcdoc$UltimateBook$UltimateBook$en-us.html

This is another use of Bazaar page: not just documenting a project, but being the project page . I think this focus is useful to launch new initiatives with more than one person.

The project is in an initial phase: to get people and to define what to do from here.

Best regards
Koldo
