Subject: Compiling Fortran sources in TheIde
Posted by koldo on Thu, 28 Jan 2010 14:12:45 GMT

Hello all

I have some .for and .c files that form a command line program in Windows, that I would like to compile from TheIde.

Is it possible ?. Do you have any experience ?

In my first try it seems that TheIde does not consider them source code and do not try to compile them.

Best regards
Koldo
