sergeynikitin wrote on Wed, 27 January 2010 06:353. Can we do more than the standard URL?
Some search engines are a very bad characters like $.

I want to make it like
http://www.ultimatepp.org/www/uppweb/overview-en-us.html
or
http://www.ultimatepp.org/www-uppweb-overview-en-us.html
instead
http://www.ultimatepp.org/www$uppweb$overview$en-us.html
This can be done in two ways
1-st - to alter the generation of html (in this approach is less important - lost already established links)
2-nd - make RewriteEngine to rewrite the page address (in this approach minus - the opacity of editing options). respectively, need only links to match.

The best approach, I think, would be a 1-st with rewriting rules for RewriteEngine in .htaccess to save old links for compability.

Could we simply use some better character instead '$' ?
