koldo wrote on Mon, 01 February 2010 16:49I am not quite convinced that file extension is equivalent to file flag.... (Maybe just give me a couple of hours to think about it Smile

Also, maybe GetSymLinkPath should simply return String and Null in the case of error?
Fully agree
Solution would be to load the .lnk file and see if has the correct format, like the UNIX "file" utility does for files, but I don't think we want to do that.
