Subject: Re: GUI with Menu bar and 5 Labels/Text Boxes
Posted by nlneilson on Tue, 02 Feb 2010 21:06:13 GMT

I have most of my Java code ported to C++ that uses this GUI.
 http://www.ultimatepp.org/forum/index.php?t=msg&th=4895& amp;start=0&

There are three things I have not figured out how to do using u++ and TheIDE.

I am using code like mrjt posted above for the GUI.

1. How can the initial position be set to (6,60) rather than centered.

2. How can this be set to always on top.

3. How to set it undecorated and still be able to drag it.

I can do this in Java with Eclipse and C++ with MSVC++ but need to know how this is done with u++.
