1. How can the initial position be set to (6,60) rather than centered.

If you about dialogs: use NoCenter() method of child windows, then set the positions on screen (maybe, SetRect(...)).

2. How can this be set to always on top.

Search for TopMost() method in TopWindow class.

3. How to set it undecorated and still be able to drag it.

Sorry, what do you mean? Popup?

Best regards,
Anton
