SetRect(...) does work and over rides the size set in the .lay file. It takes 4 parameters, 2 for the position and 2 for the size where Java takes 2, frame.setLocation(5, 46); The NoCenter() is not necessary.

Well, glad to help. Sorry, but I haven't time for examples =(

About NoCenter(): if you can't change the position of dialog, use this method. Just remember for future =)

Best regards and sorry for my English,
Anton
