```
hres = psl->QueryInterface(IID_IPersistFile, (PVOID *) &ppf);
if(SUCCEEDED(hres)) {
    hres = ppf->Load(ToSystemCharsetW(linkPath), STGM_READ);
    if(SUCCEEDED(hres)) {
        char fileW[_MAX_PATH] = {0};
        psl->GetPath(fileW, _MAX_PATH, NULL, 0);
        filePath = FromSystemCharset(fileW);
    } else
        return false;
```

Is not a memory leak there? (no release for ppf upon return false).
