Hi gedumer

Yes, this dependency was added about two weeks ago (announced here). I guess you got a i386 deb from sf.net, right? Unfortunately I forgot to add this to the buildscript Koldo uses to build these packages, so the dependency wasn't installed automatically Koldo already noticed and we fixed this earlier today. Next published deb should behave as expected.

I'm sorry for the troubles and bad impression it caused.

Best regards,
Honza
