koldo wrote on Sat, 06 February 2010 08:30luzr wrote on Sat, 06 February 2010 13:20Like this:

```
bool FindFile::IsSymLink() const
{
 String name = GetName();
 if(GetFileExt(name) != ".lnk")
  return false;
 return !IsNull(GetSymLinkPath(AppendFileName(path, name)));
}
```

Mirek
Well. It is not the most efficient possible but it is very valid.

Why? System calls appear to be equivalent for the test and for obtaining the path.
