alex100 wrote on Tue, 09 February 2010 06:20Hi,

Does U++ has any type of control object to display maps, or better to use a map provider and display maps on windows?

Suppose i want to make an application that shows a google map with some bookmarks, zoom etc. Does u++ has support for this?

Thanks
Alex

You are one lucky guy:) I needed just this a couple of days back, so there is now code in bazaar forum.

Thinking about it, I might make it an example.
