alex100 wrote on Tue, 09 February 2010 09:24Ok, it works fine
It seems that basic functionality and implementation is in there. Now i have to implement zooming (dbclick) and drag features

By the way, it there any way to use freely google maps into a commercial application?

I think not, but you better check GoogleMap static map API.

Or it is better to use a free map provider (not so complete as google is) instead?

Are there any?
