
Subject: Uuid formating with dashes

I need to have my Uuids formated with dashes in the standard positions.

So I added to Uuid.h as a counterpart to Format:

String UuidFormatDashes(const Uuid& id);

and Uuid.cpp:

```
String UuidFormatDashes(const Uuid& id) {  
    return Sprintf("%08X-%04X-%04X-%04X%08X", id.a, (id.b & 0xFFFF0000) >> 16, id.b &  
    0x0000FFFF,  
    (id.c & 0xFFFF0000) >> 16, id.c & 0x0000FFFF, id.d);  
}
```

Alternatively, and even probably better this method should be part of Uuid class and drop the prefix.
