On a different computer the frame is clipped.

The image on the left is on the computer the upp GUI was made on.

Win XP Mobile Intel(R) 945 Express Chipset

The right image is on:

Win XP ATI Radeon Xpress 200m

On Win Vista it is not clipped but a small amount is added on the bottom ~ 4 to 5 pixels.

On Win7 the bottom is clipped so the bottom text box is missing and the right is clipped about the width of ~ 4 characters.

The code is about done but I can't deploy it if the frame will be clipped.

What could cause this?
