It may be caused by my placing it in the top left.

I have tried 2 ways:

    LeftPosZ(4, 245).TopPosZ(50, 86);
or
    SetRect(4, 50, 247, 85);

Leaving it centered it is not clipped at least for the other Win XP.

How can the position be set so there will not be a clipping problem?
