Thanks Mirek, that was fast.

I have 1952, I will find out how to load the updater module for the /live_update.

I appreciate your example code that is similar to Java.

```
void MyDialogWindow::Key(dword code, int)
{
   if(point1Field.HasFocus()) {
      point1Action();
      return;
   }
}
```
Since I have used this in Java this may be the way to port that to U++.
