Subject: Designer: Tutorial for beginners
Posted by forlano on Sun, 16 Apr 2006 08:47:04 GMT

Hello,

I've prepared a little tutorial that perhaps could be useful to who begin with U++. The English I have used I'm aware is not the best (corrections are very appreciated). If somebody believes the tutorial is useful he can modify it and do with it what he wants without my permission.

Luigi

PS: I hope this is the correct place where to post this tutorial, otherwise I've spoiled once more the Aris' time

PPS: Happy Easter!

Edit by fudadmin: P.S. This is the start of second merged topic. After less than one month with Ultimate++ Luigi has written a tutorial himself. Thank you!!!
