Hi,

For some reason, the upp-win32-2070.exe installer (downloaded from http://code.google.com/p/upp-mirror/downloads/list) refuses to even start on my computer. No messages are given. (OS: Windows 7 Professional x64).

The same file on sourceforge.net is short and broken.

Best regards,

Tom

UPDATE: The file upp-win32-2081.exe does not run either. The last time I updated was upp-win32-1952.exe and that installer still works.
