Tom1 wrote on Tue, 16 February 2010 09:40Hi,

For some reason, the upp-win32-2070.exe installer (downloaded from <http://code.google.com/p/upp-mirror/downloads/list>) refuses to even start on my computer. No messages are given. (OS: Windows 7 Professional x64).

The same file on sourceforge.net is short and broken.

Best regards,

Tom

UPDATE: The file upp-win32-2081.exe does not run either. The last time I updated was upp-win32-1952.exe and that installer still works.  
Hello Tom1

You are right.

While getting the right installer upp-win32-2070.exe in SF has been removed.
